Challenge words: 21. decay 22.lifetime

Upcoming Events:

- ❖ Science Unit Assessment Monday Aug 28th
- ❖ Math Topic 8 Test Wednesday Aug. 30th
- ❖ Spelling Test Friday Aug 25th
- ❖ Math/Reading Skills Practice Test Friday Aug 25th (not for grade-for progress monitoring)

✓ Thank you to all the parents who have helped out by donating to our class wish list! The kids and I appreciate it!

Contact Information:

Email: kesmodele@platoacademy.net

Website: <http://kesmodele.weebly.net>

All homework assignments are available on my website!

Focus This Week:

August-Respect

Reading: Narrative Story Elements

Writing: Story Structure and Narrative Writing

Math: Topic 8 Review-Estimating Sums, differences, rounding, addition and subtraction strategies.

Science: Chapter 1- Living Things

Social Studies: Government and Civics

Homework for This Week:

- ❖ Weekly homework Packet
- ❖ Practice Spelling Words
- ❖ Read!
- ❖ ** Review What is Science? pg. 333-336** Not required, but encouraged if your child likes to review before a test ☺

Helpful Websites for Third Graders:

- www.frontrow.com
- www.spellingcity.com
- www.tenmarks.com
- www.coolmath.com
- www.Xtramath.com
- www.prodigymath.com
- www.floridastudents.com

I have read this newsletter with my child. We have completed the homework, reviewed the spelling words, and studied for any tests. Please sign and return this with your child's completed homework on Friday September 1st, 2017.

Parent: _____

Student: _____

Name _____

The Foolish Coyote

Every autumn, a group of blackbirds gathered on top of a mountain to sing and dance before they headed south for the winter. One day, a coyote was hunting on the mountain. He heard the blackbirds singing. When he looked up, he saw them flying in the air.

Day 1

1. What characters are in this story? _____
2. Who is probably the main character? _____
3. Is this writing fiction or nonfiction? _____
4. Explain your answer for question 3. _____

"How beautifully you fly and dance!" the coyote cried. "Can you teach me to do that? If I could fly, I could be the great king of the coyotes."

The blackbirds knew the coyote could never fly, but they wanted to have some fun. "We can teach you to fly. Come to the top of the mountain, and we will assist you."

Day 2

1. Write the word from the story that is a compound word. _____
2. What other word could you use instead of **assist** in this story? _____
3. What can you tell about the character of the blackbirds? _____
4. Would you say the coyote is **proud** or **humble**? _____ Underline the sentence that supports your answer.

When the coyote got to the mountaintop, the birds told him to sit down. Then, each bird pulled a feather from its shiny black suit. "This will hurt," said the birds. "But, this is the only way you will be able to fly."

Day 3

1. What sound does the **ul** in **suit** make: **oo** as in **boot** or **u** as in **cup**? _____
2. What is each bird's "shiny black suit"? _____
3. Would you say the blackbirds are **mean** or **funny**? Explain. _____
4. Do you think the coyote will let the blackbirds hurt him? Explain. _____

The birds all stuck feathers into the coyote's legs and tail. The feathers jabbed terribly, but the coyote said nothing. He sat very still until the birds had finished. All the while, he was thinking of what a great king he would be.

Day 4

1. What word from the story means "poked with a sharp point"? _____
2. Look back at your prediction from Day 3. Did the coyote let the blackbirds hurt him? Explain. _____
3. Do you think the feathers will make the coyote king? Explain. _____
4. Would you say the coyote is **brave** or **foolish**? _____

* Monday

Name _____

Set A pages 405–410

Reteaching

You can use properties of addition to help solve addition problems.

Remember that both sides of the equal sign must have the same value.

The Commutative Property of Addition

$$12 + \square = 15 + 12$$

$$12 + 15 = 15 + 12$$

You can order addends in any way, and the sum will be the same.

In 1–6, write each missing number.

1. $18 + \underline{\quad} = 18$

2. $14 + (16 + 15) = (\underline{\quad} + 16) + 15$

3. $\underline{\quad} + 13 = 13 + 17$

4. $28 + (\underline{\quad} + 22) = 28 + (22 + 25)$

5. $62 + 21 + 0 = 62 + \underline{\quad}$

6. $\underline{\quad} + (26 + 78) = (31 + 26) + 78$

7. Use the numbers 78 and 34 to write an equation that shows the Commutative Property of Addition.

The Associative Property of Addition

$$3 + (7 + 8) = (3 + \square) + 8$$

$$3 + (7 + 8) = (3 + 7) + 8$$

You can group addends in any way, and the sum will be the same.

The Identity Property of Addition

$$30 + \square = 30$$

$$30 + 0 = 30$$

The sum of any number and zero is that same number.

Set B pages 411–416

You can find patterns using an addition table.

Remember that properties can help you understand patterns.

| | | | | |
|---|----|----|----|----|
| + | 4 | 5 | 6 | 7 |
| 3 | 7 | 8 | 9 | 10 |
| 4 | 8 | 9 | 10 | 11 |
| 5 | 9 | 10 | 11 | 12 |
| 6 | 10 | 11 | 12 | 13 |
| 7 | 11 | 12 | 13 | 14 |
| 8 | 12 | 13 | 14 | 15 |

| | | | | | | | | |
|---|---|---|---|---|---|----|----|----|
| + | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 0 | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| 2 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| 3 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 4 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 5 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |

3 more than an even number is always an odd number.

3 is an odd number.

An even number plus an odd number is an odd number.

1. Find the doubles-plus-2 facts. What pattern do you notice about the sums?

2. Explain why your pattern works.

Use examples to make generalizations!

Set C pages 417–422

You can use a number line to round.

Nearest ten: 437 rounds to 440.

Nearest hundred: 437 rounds to 400.

Think about place value when you round.

**Set D** pages 423–428

Use mental math to find $374 + 238$.

Break apart 374 and 238.

$$300 + 70 + 4 \text{ and } 200 + 30 + 8$$

Add hundreds, tens, and ones.

$$(300 + 200) + (70 + 30) + (4 + 8)$$

$$500 + 100 + 12 = 612$$

$$\text{So, } 374 + 238 = 612.$$

Set E pages 429–434

Use mental math to find $400 - 168$.

Count on.

$$168 + 2 = 170$$

$$170 + 30 = 200$$

$$200 + 200 = 400$$

$$2 + 30 + 200 = 232$$

$$\text{So, } 400 - 168 = 232.$$

Remember that if a number is halfway between, round to the greater number.

1. Round 374 to the nearest ten and the nearest hundred.
2. Round 848 to the nearest ten and the nearest hundred.
3. Mark's family traveled 565 miles. Rounded to the nearest ten, about how many miles did they travel?
4. Sara collected 345 shells. Rounded to the nearest hundred, about how many shells did she collect?

Remember that you can break apart both addends when finding sums mentally.

1. $302 + 56$
2. $463 + 418$
3. $222 + 725$
4. $689 + 115$

Remember that you can count on when subtracting mentally.

1. $523 - 163$
2. $847 - 372$
3. $768 - 259$
4. $282 - 125$

Tuesday

Name _____

Set F pages 435–440

Estimate $478 + 112$.

Round each addend to the nearest ten.

$$\begin{array}{r} 478 \rightarrow 480 \\ + 112 \rightarrow 110 \\ \hline 590 \end{array}$$

Round each addend to the nearest hundred.

$$\begin{array}{r} 478 \rightarrow 500 \\ + 112 \rightarrow 100 \\ \hline 600 \end{array}$$

Use compatible numbers.

$$\begin{array}{r} 478 \rightarrow 475 \\ + 112 \rightarrow 110 \\ \hline 585 \end{array}$$

Set G pages 441–446

Estimate $486 - 177$.

Round each number to the nearest hundred.

$$\begin{array}{r} 486 \rightarrow 500 \\ - 177 \rightarrow 200 \\ \hline 300 \end{array}$$

Round each number to the nearest ten.

$$\begin{array}{r} 486 \rightarrow 490 \\ - 177 \rightarrow 180 \\ \hline 310 \end{array}$$

Use compatible numbers.

$$\begin{array}{r} 486 \rightarrow 475 \\ - 177 \rightarrow 175 \\ \hline 300 \end{array}$$

Remember that compatible numbers are numbers close to the actual numbers and are easier to add mentally.

Round to the nearest hundred.

1. $367 + 319$ 2. $737 + 127$

Round to the nearest ten.

3. $298 + 542$ 4. $459 + 85$

Use compatible numbers.

5. $372 + 173$ 6. $208 + 164$

7. Will rounding to the nearest ten or the nearest hundred give a closer estimate of $314 + 247$? Explain your answer.

Reteaching
Continued

Remember that an estimate is close to the actual answer.

Round to the nearest hundred.

1. $527 - 341$ 2. $872 - 184$

Round to the nearest ten.

3. $387 - 298$ 4. $659 - 271$

Use compatible numbers.

5. $472 - 228$ 6. $911 - 347$

7. Will rounding to the nearest ten or the nearest hundred give a closer estimate of $848 - 231$? Explain your answer.

Set H pages 447–452

A theater sells 128 tickets on Friday. The theater has sold a total of 679 tickets. How many tickets had the theater sold before Friday?

You can use an addition equation or a subtraction equation to solve this problem.

$$? + 128 = 679$$

$$679 - 128 = ?$$

Find the difference. Then use addition to check your subtraction.

$$\begin{array}{r} 679 \\ - 128 \\ \hline 551 \end{array} \qquad \begin{array}{r} 551 \\ + 128 \\ \hline 679 \end{array}$$

The numbers in the addition and subtraction match, so 551 is the correct difference.

Set I pages 453–458

Think about these questions to help you model with math.

Thinking Habits

- How can I use math I know to help solve this problem?
- How can I use pictures, objects, or an equation to represent the problem?
- How can I use numbers, words, and symbols to solve the problem?

Remember that you can use inverse operations to check your work.

Add or subtract. Check your work.

1.
$$\begin{array}{r} 746 \\ - 532 \\ \hline \end{array} \qquad \begin{array}{r} \square\square\square \\ + 532 \\ \hline \square\square\square \end{array}$$

2.
$$\begin{array}{r} 237 \\ + 412 \\ \hline \end{array} \qquad \begin{array}{r} \square\square\square \\ - 412 \\ \hline \square\square\square \end{array}$$

3. Toni read 131 pages on Monday and some pages on Tuesday. She read 289 pages in all. How many pages did Toni read on Tuesday?

Remember to apply the math you know to solve problems.

Elena has \$265. She buys a jacket that costs \$107 and a sweater that costs \$69. How much money does Elena have left?

1. What is the hidden question you need to answer before you can solve the problem?
2. Solve the problem. Draw bar diagrams to represent the problem. Show the equations you used.

* WEDNESDAY

Name _____

Nouns

5

To make the plural form of nouns that end in a consonant and y, change the y to i and add es.

Singular

penny

berry

Plural

pennies

berries

Write the plural form of a noun from the word box to answer each riddle.

cherry

worry

party

fairy

puppy

city

1. We are like towns, but we are bigger. What are we?

2. People pick us because we are sweet to eat. What are we?

3. We have wagging tails and often get into trouble. What are we?

4. You're happy when you don't have any of us. What are we?

5. You come to us for cake, ice cream, balloons, and fun. What are we?

6. You find us in many children's stories. What are we?

Name _____

Some nouns have special spellings in the plural form. They are called **irregular plurals**. You must practice these nouns and remember how to spell them.

| <u>Singular</u> | <u>Irregular Plural</u> |
|-----------------|-------------------------|
| child | children |
| foot | feet |
| goose | geese |
| man | men |
| mouse | mice |
| ox | oxen |
| tooth | teeth |
| woman | women |

Fill in each blank with the plural form of a noun from the list.

We read a book in school about _____ who lived long ago in the West. Girls helped the _____ with chores. Boys helped raise chickens and _____. The _____ used _____ to plow fields. The people worked outside, even in the winter, and their hands and _____ were often cold. Animals such as _____ got into their food supplies. Bears and mountain lions with sharp claws and _____ were a danger. Life was hard in the Old West!

Word List

- Associative Property of Addition
- Commutative Property of Addition
- compatible numbers
- estimate
- Identity Property of Addition
- inverse operations
- mental math
- place value
- round

Understand Vocabulary

Circle the property of addition shown in the following examples.

1. $17 + 14 = 14 + 17$

Associative Property Commutative Property Identity Property

2. $93 + 0 = 93$

Associative Property Commutative Property Identity Property

3. $8 + (5 + 9) = (8 + 5) + 9$

Associative Property Commutative Property Identity Property

4. $65 + 0 = 0 + 65$

Associative Property Commutative Property Identity Property

Choose the best term from the box. Write it in the blank.

5. You _____ when you use the nearest multiple of ten or hundred.

6. Addition and subtraction are _____.

7. _____ is the value given to the place a digit has in a number.

8. Numbers that are easy to compute mentally are _____.

9. You do not need pencil and paper when using _____.

Use Vocabulary in Writing

10. Jim found that $123 + 284$ is about 400. Explain what Jim did.
Use at least 3 terms from the Word List in your answer.

The Egg-Laying Mammal

When people in England first saw a stuffed platypus, they thought it was a joke. They thought someone had put a duck's bill on a beaver's body! Then, they saw other strange things. The platypus had webbed feet. It had short legs like a lizard's. It had two layers of fur. And, it had a **spur** on each of its back leg. What kind of animal was this?

The platypus lives in Australia. It is one of the strangest animals in the world. For one thing, it lays eggs, even though it is a **mammal**. It lives underground, but it spends a lot of time in the water. A platypus dives in the water up to 80 times an hour to get food. Its webbed feet and flat tail help it swim. It catches worms, snails, and shrimp. It carries food in its cheeks until it is ready to eat. The platypus does not have teeth. It has little pads inside its bill that grind its food.

This furry brown animal is about the size of a house cat. It lives about as long as a cat too—10 to 17 years. Its babies are called puggles. They hatch out of their eggs. The mother platypus feeds them milk. The babies live in a **burrow** that is built with long tunnels for doorways. Platypuses make burrows on the banks of rivers or streams. This lets them hunt for food easily.

Only the male platypus has spurs that it uses like stingers. It uses its spurs in fighting. When another animal is stung, it can die. Humans do not die from the sting of a platypus. But, they do get very sick. The poison in a spur causes great pain. People in Australia learned to leave this odd animal alone!

spur: a sharp spine

mammal: an animal that feeds milk to its young

burrow: a nest in the ground

Name _____

3.RI.1, 3.W.3, 3.L.2, 3.L.4

The Egg-Laying Mammal

Answer the questions.

1. Read the following sentence from the story and answer the question.

Platypuses make burrows on the banks of rivers or streams.

Which definition of the word *banks* matches the way it is used in the story?

- A. places to keep money
- B. sets of cards used in games
- C. groups of clouds
- D. sloped grounds on the edge of a body of water

2. What is a *puggle*? Write your answer in a complete sentence.

3. Which of the following is not a feature of the platypus?

- A. a bill like a duck's
- B. a body like a beaver's
- C. paws like a dog's
- D. short legs like a lizard's

4. Which of the following behaviors is not typical of a mammal?

- A. swimming in water
- B. laying eggs
- C. fighting other animals
- D. digging holes

5. Complete the sentence.

It has _____ inside its _____
that grind its _____.

6. Which sentence shows commas used correctly?

- A. It catches, worms snails and shrimp.
- B. It catches worms, snails and, shrimp.
- C. It catches worms snails, and shrimp.
- D. It catches worms, snails, and shrimp.

7. Read this sentence.

I saw a platypus at the zoo.

Rewrite the sentence to make it more exciting. Add details and adjectives.

8. When people first saw the platypus, they thought it was a joke. On another sheet of paper, write about a time you saw something that you thought was a joke. Choose words carefully to make the story interesting and even funny.

Name _____

*Thursday

Vocabulary

1. **Place value** is the value given to the place a digit has in a number.

Write 372 in the place-value chart.

The 3 is in the hundreds place. Its value is 300.

The 7 is in the _____ place. Its value is _____.

The 2 is in the _____ place. Its value is _____.

2. To find $353 + 234$, you can use place value to break the problem into smaller problems.

Find the sum of each place value.

| | Hundreds | Tens | Ones |
|---------------|----------|------|------|
| $353 =$ | 300 | 50 | 3 |
| $234 =$ | 200 | 30 | 4 |
| Sums → | | | |

Now add the sums of each place value from the table.

$500 + 80 + 7 =$

So, $353 + 234 =$ _____.

3. Find $271 + 425$. Break the problem into smaller problems.

| Hundreds | Tens | Ones |
|--------------|-------------|------------|
| 200 | 70 | 1 |
| <u>+ 400</u> | <u>+ 20</u> | <u>+ 5</u> |

Add the sums.

| | |
|-------------------|------------|
| Hundreds → | 600 |
| Tens → | 90 |
| Ones → | <u>+ 6</u> |

So, $271 + 425 =$ _____.

On the Back!

4. Find $156 + 461$. Break the problem into smaller problems. Then, add the sums of each place value. Show your work.
